The Language of Crop Circles - Judith K. Moore en Johan Keijser

The cosmic meaning of crop circles in Europe and North America

Crop circles have fascinated people a long time already. Why are they there? What do they mean? The authors take you to curious and beautiful crop circles in Holland, England, other European countries and North America, created between 1590 and 2005. Only few people know that crop formations are influencing a variety of aspects of Mother Earth: humans, the plant and animal realms, water, air, and cultural and social relations. The 70 circles dealt with in this book address the most severe global problems and they help us during the earth changes.

By meditating on photos and the associated star glyphs – drawings of great power in a universal cosmic language – you may personally profit of the special effects of each circle, at the same time enhancing the positive effects on Mother Earth.

Medium and co-author Judith Moore tells you on the basis of channellings who make the circles and how it is done. Furthermore you will get a surprising answer to the question what we are to think of man-made circles.
