

ICCA was founded in 1994 and has more than 6000 Crop Circles in over 50 countries listed and continuous to archive every new seasons's new formations. At each new year ICCA produces a its „Annual Report“ which resembles a statistical review of the past crop Circle year worldwide. We only do list "classical" crop circle formation in which the plants were flattened in a geometrical pattern. Not in cluded are so called "RDF - randomly Downed Formations" or pattern cut into the fields like maize-labyrinths etc. ICCA gets regularly updated, like with the years previous to 1995, so some numbers may change over the time. Please note the to-date stand.

Stand: 20.02.2008

BASIC OVERVIEW

- 1995: 188
- 1996: 240
- 1997: 228
- 1998: 195
- 1999: 245
- 2000: 275
- 2001: 201
- 2002: 238
- 2003: 251
- 2004: 238
- 2005: 229
- 2006: 193
- 2007: 171
- 2008...
